Competitive Programming, Web Development, Front-End Development, Back-End Development, Django, DjangoRest Framework, C/C++, HTML, CSS, Bootstrap, JavaScript, Communications, English

Education

IIIT Bhagalpur | Bhagalpur, Bihar
Computer Science and Engineering | 07/2026

Vidyamandir Sr. Secondary School | Kota, Rajasthan
HSC | 07/2021

Projects

1.) [Weather Website](#)

Developed a dynamic weather forecasting website that provides real-time weather updates and forecasts. Utilized APIs to fetch weather data and employed responsive design principles to ensure a seamless user experience across devices. Implemented features such as location-based weather information, extended forecasts, and user-friendly interfaces. Technologies used include [mention any key technologies you used, e.g., Django, JavaScript, HTML/CSS, API integrations].

2.) [Blogging Website](#)

Created a comprehensive blogging website that allows users to write, edit, and publish posts. Features include user authentication, content management, and interactive commenting. Designed with a focus on intuitive navigation and responsive design to enhance user engagement. Technologies used include [mention key technologies, e.g., Django, React, HTML/CSS, PostgreSQL].
